Dear FIA-FSP Representative,

**Re: Relationship with the Bulkley Valley Research Centre**

The Office of the Wet'suwet'en ([www.wetsuweten.com](http://www.wetsuweten.com)) is located in Smithers, BC, and has a traditional territory of over 22000 km<sup>2</sup>. Our purpose is to protect the lands and resources of Wet'suwet'en territory for the betterment of all, develop Wet'suwet'en capacity for economic development on our territory and to preserve our culture and resources for our children and generations to come.

Some of the responsibilities of the Natural Resources department include establishing an information base of the resources within the Wet'suwet'en territory, assessing impacts on Wet'suwet'en interests from resource development and provide updates to and seek direction from our Hereditary Chiefs.

We are encouraged by the First Nations engagement protocol established by the Bulkley Valley Research Centre (BVRC). This protocol allows for a mutual information and capacity exchange to occur, with benefits for both groups.

Therefore, we support the BVRC in their project development and proposal writing initiatives, and look forward to working with them on their research projects.

Missiyh,

A handwritten signature in black ink, appearing to read "David de Wit".

David de Wit  
Natural Resources, Manager
